

THE COMPLETE DUCT SOURCE
We Make Selling Ductwork Easy

US Duct—Floor Sweep

US Duct's Floor Sweep's are used to remove debris from the shop floor where clean up is needed. The double hinged door is held closed by the vacuum of the system and when opened, allows for debris to enter the system. Our floor sweeps come standard with rolled-lip ends that attached easily to our clamp together duct system. Raw, flanged and US Tubing connection ends are also available. Welded floor anchor angles are available as well.
